Testing Final Deadbolt Operation

If resistance, re-check installation and confirm mounting screws have not been over-tightened.

Confirm deadbolt operates smoothly with no resistance. If resistance, re-check installation and confirm mounting screws have not been over-tightened.
Installing Optional Smart Module

DO NOT install Smart Module with batteries in unit. Damage may occur.
Installing Batteries & Cover

"Welcome to Yale Real Living."

Bolt must be in retracted (unlocked) position before installing batteries.

Tighten screw to replace cover.
Handing the Lock

AFTER installing batteries and cover or AFTER a factory reset, activate touchscreen and create Master PIN code. Lock will then automatically determine handing.

See 1 of Programming Instructions for how to set master code.

Congratulations, you've installed the Yale® Assure Lock® Interconnected Key Free Touchscreen (YRC256)!
Continue with the Programming Instructions to customize your product.
## Hardware Troubleshooting

Cycle lock in both the locked and unlocked positions. If problems are found:

**NOTE TO INSTALLER AND CONSUMER**

While Yale® has included several features to prevent lockout (9-Volt battery jumper, low battery warnings), it is still possible for a lockout situation to occur. Because this product does not have a mechanical override (a key), Yale® recommends to use this product in an environment where there are additional entry points into the dwelling.

Resetting Lock to Factory Default

When resetting the lock, all user codes, including the Master PIN code*, are deleted. All programming features are reset to original default settings (see below).

1. Remove the battery cover and batteries.
2. Remove the interior lock to access the reset button hole. (See image at right.)
3. Re-insert 3 batteries and insert a small screwdriver into the hole; holding the reset button for 3 seconds.
4. While still holding the reset button, insert the 4th battery and hold the reset button for an additional 3 seconds.
5. Release the reset button.
6. Re-install the interior lock onto the door.

Upon reset, Master PIN Code creation is the only option available and must be performed prior to any other programming of the lock.

For best results, the lock should be installed on the door when resetting the lock to factory default. If the process was done and the lock was not installed on the door, review the Re-Handing instructions listed in Hardware Troubleshooting.

*The Master PIN code must be registered prior to any other programming of the lock.
Definitions

**All Code Lockout Mode:** This feature is enabled by the Master code. When enabled, it restricts all user (except Master) PIN code access. When attempting to enter a code while the unit is in Lockout, the RED locked padlock will appear on the screen.

**Automatic Re-lock Time:** After a successful unlock, the unit will re-lock automatically after duration selected in the **Advanced Lock Settings** (Main Menu selection #3).

**Handing the Lock:** Lock handing refers to which direction the bolt comes out of the door (right or left). If the lock was programmed off the door, the lock may need adjusting. Review Handing the Lock instructions and/or Re-Handing instructions listed in Hardware Troubleshooting.

**Inside Indicator Light:** Located on the interior escutcheon. Shows active status (Locked) of lock and can be enabled or disabled in the **Advanced Lock Settings** (Main Menu selection #3).

**Language Setting Mode:** Choosing English (1), Spanish (2) or French (3) becomes the (default) setting for the lock’s voice prompts.

**Low Battery:** When battery power is low, the Low Battery Warning indicator flashes RED. If battery power is completely lost, use the 9Volt battery override. To use the 9V battery override apply 9V battery, in either direction, to terminals below the touchscreen for backup power option. Wake up the lock and enter your pin code to unlock the door.

**Master PIN Code:** The Master PIN code is used for programming and for feature settings. **It must be created prior to programming the lock.** The Master code will also operate (unlock/lock) the lock.

**Network Module Setting:** With the optional Network Module installed, this setting becomes available thru the Main Menu (7) and allows the lock to connect with a network controller.

**One Touch Locking:** When the latch is retracted, activating the keypad will extend the latch (during Automatic Re-lock duration or when Automatic Re-lock is disabled). When One-Touch Re-lock is **not** in use (disabled), any valid PIN code will re-lock the lock.

**Previous:** While in Menu Mode, pressing this icon cancels the current operation and returns the user to the previous step.

**Privacy Mode:** Privacy mode is disabled by default. Enable Privacy mode by pressing the privacy button for 4 seconds to put lock in do-not-disturb mode (all pin codes are disabled).

**Shutdown Time:** The unit will shutdown (flashing RED) for sixty (60) seconds and not allow operation after the wrong code entry limit (5 attempts) has been met.

**Tamper Alert:** Audible alarm sounds if attempting to forcibly remove outside lock from door.

**User PIN Code:** The user code operates the lock. The maximum number of user codes with Z-Wave Plus or Zigbee network module is 250; without network module or with iM1 network module, maximum is 25; with Bluetooth, maximum is 12. Note: When deleting user pin code(s), screen will display user pin code being deleted.

**Volume Setting Mode:** The volume setting for PIN code verification is set to **Low (2)** by default; otherwise it can be set to **High (1)** or **Silent (3)** for quiet areas.

**Wrong Code Entry Limit:** After five (5) unsuccessful attempts at entering a valid PIN code, the unit will shut down and not allow operation for sixty (60) seconds.
Feature Programming Through Menu Mode
Using Master PIN code*

1. Touch screen with back of hand or palm to activate.
2. Enter 4-8 digit master PIN code* followed by key.
   Lock Response: "Menu mode, enter number, press key to continue."
3. Enter digit corresponding to the function to be performed followed by the key. Follow the voice commands.

*The Master PIN code must be registered prior to any other programming of the lock.

Note: After Master PIN code is entered, lock will automatically hand itself. For best results, lock should be installed on door during this process. If this process was done and lock was not installed on door, review the Re-Handing instructions listed in Hardware Troubleshooting.

Default settings in bold.

**This function appears only with network module installed.

***This function appears only with P/N C620 installed.
## Programming Troubleshooting

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Suggested Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lock does not respond – door is open and accessible.</td>
<td>• Touchscreen becomes active when pressed with whole hand. Use a larger area of the hand or fingers and verify contact with at least 3 areas.</td>
</tr>
<tr>
<td></td>
<td>• If touchscreen numbers are visible, check to see if they respond when pressed.</td>
</tr>
<tr>
<td></td>
<td>• Check batteries are installed and oriented correctly (polarity) in the battery case.</td>
</tr>
<tr>
<td></td>
<td>• Check batteries are in good condition; replace batteries* if discharged.</td>
</tr>
<tr>
<td></td>
<td>• Check to see if touchscreen harness is fully connected and not pinned.</td>
</tr>
<tr>
<td>Lock does not respond – door is locked and inaccessible.</td>
<td>• Batteries may be completely discharged.</td>
</tr>
<tr>
<td></td>
<td>• Use mechanical key to gain entry and replace batteries*.</td>
</tr>
<tr>
<td>Unit is on for a while then shows no reaction. Lights dim.</td>
<td>• Batteries do not have enough power. Replace batteries*.</td>
</tr>
<tr>
<td>Unit chimes to indicate code acceptance, but the door will not open.</td>
<td>• Check the door gaps for any foreign objects between door and frame.</td>
</tr>
<tr>
<td></td>
<td>• Check that the wire harness is firmly connected to the PCB.</td>
</tr>
<tr>
<td>Unit operates to allow access, but will not automatically re-lock.</td>
<td>• Check to see if Auto Re-lock Mode is enabled.</td>
</tr>
<tr>
<td></td>
<td>• Disable Auto Re-lock Mode to lock the door (automatically).</td>
</tr>
<tr>
<td></td>
<td>• If low battery indicator is lit (see below), change batteries*.</td>
</tr>
<tr>
<td>PIN codes will not register.</td>
<td>• PIN codes must consist of 4 to 8 digits to register.</td>
</tr>
<tr>
<td></td>
<td>• The same PIN code cannot be used for multiple users.</td>
</tr>
<tr>
<td></td>
<td>• Registration/management of PIN codes is set by the authority of the Master Code, which is set first.</td>

<tr>
<td>Upon entering a PIN code and pressing the (✓) key, the unit responds &quot;Wrong number of digits&quot;.</td>
<td>• The digits entered were incorrect or incomplete. Re-enter the correct code followed by the check (✓) key.</td>
</tr>
</tbody>
</table>

* When batteries are replaced, Network Module locks have a real time clock that will be set through the User Interface (UI); it is recommended to verify correct date and time particularly those locks operating under Daylight Saving Time (DST).
**FCC:**

*Class B Equipment*

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**Warning:** Changes or modifications to this device, not expressly approved by ASSA ABLOY Residential Group could void the user’s authority to operate the equipment.

**Industry Canada:**

This Class A digital apparatus meets all requirements of the Canadian Interference Causing Equipment Regulations.

Cet appareillage numérique de la classe A répond à toutes les exigences de l’interférence canadienne causant des règlements d’équipement.

Adding a Yale Z-Wave® Plus Smart Module to your Assure Lock & Z-Wave System

1. Install the Yale Smart Module into the slot above the battery compartment
   **IMPORTANT:** The batteries must be removed before removing the Yale Smart Module:
   - Remove battery cover
   - Remove batteries
   - Insert or remove Yale Smart Module
   - Reinstall batteries
   - Reinstall battery cover

2. Open the Z-Wave system's smart home or alarm app on your smartphone or tablet

3. Follow the in-app instructions for adding a new device

4. On your lock keypad, enter your master entry code followed by the icon

5. Press the 7 key followed by the icon

6. Press the 1 key followed by the icon

Removing a Yale Z-Wave® Plus Smart Module from your Assure Lock & Z-Wave System

1. On your lock keypad, enter your master entry code followed by the icon

2. Press the 7 key followed by the icon

3. Press the 3 key followed by the icon

4. Open the Z-Wave system's smart home or alarm app and follow the instructions for removing a device

5. Remove the Yale Smart Module from the slot above the battery compartment
   **IMPORTANT:** The batteries must be removed before removing the Yale Smart Module:
   - Remove battery cover
   - Remove batteries
   - Insert or remove Yale Smart Module
   - Reinstall batteries
   - Reinstall battery cover

6. If you're adding a new Yale Smart Module, follow the instructions included with it
**Warning:** Changes or modifications to this device, not expressly approved by ASSA ABLOY Residential Group, could void the user’s authority to operate the equipment.

This device is a security enabled Z-Wave Plus product that is able to use encrypted Z-Wave Plus messages to communicate to other security enabled Z-Wave Plus products. This device must be used in conjunction with a Security Enabled Z-Wave Controller in order to fully utilize all implemented functions. This product can be operated in any Z-Wave network with other Z-Wave certified devices from other manufacturers. All non-battery operated nodes within the network will act as repeaters regardless of vendor to increase reliability of the network.

**FCC:**
Contain FCC ID: U4A-YRHCPZW0FM

This device must be used in conjunction with a Security Enabled ZigBee Controller in order to fully utilize all implemented functions. This product can be operated in any ZigBee network with other ZigBee certified devices from other manufacturers. All non-battery operated nodes within the network will act as repeaters regardless of vendor to increase reliability of the network.

To Enroll the Module (Inclusion Mode):
- Enter the 4-8 digit Master PIN code followed by the key.
- Press the key followed by the key.
- Press the key followed by the key.

To Unenroll the Module (Exclusion Mode):
- Enter the 4-8 digit Master PIN code followed by the key.
- Press the key followed by the key.
- Press the key followed by the key.
FCC:
FCC ID: U4A-YRHCPZB0FM
Model: YRMZB2
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

IMPORTANT! Any changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

Industry Canada:
IC: 6982A-YRHCPZB0FM
Model: YRMZB2
This Device complies with Industry Canada License-exempt RSS standard(s). Operation is subject to the following two conditions: 1) this device may not cause interference, and 2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux standards d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes: (1) l’appareil ne doit pas produire de brouillage, et (2) l’utilisateur de l’appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d’en compromettre le fonctionnement.

Important Note:
Radiation Exposure Statement:
This equipment complies with IC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

Note Importante: (Pour l’utilisation de dispositifs mobiles)
Déclaration d’exposition aux radiations:
Cet équipement est conforme aux limites d’exposition aux rayonnements IC établies pour un environnement non contrôlé. Cet équipement doit être installé et utilisé avec un minimum de 20 cm de distance entre la source de rayonnement et votre corps.

IMPORTANT! Any changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate this equipment.

IMPORTANT! Tous les changements ou modifications pas expressément approuvés par la partie responsable de la conformité ont pu vider l’autorité de l’utilisateur pour actioner cet équipement.

Connecting the Yale Secure App with the Yale iM1 Network Module

1. After following the steps listed on other side of page for enrolling the module, download the Yale Secure app from the App Store.

2. Ensure Bluetooth® is enabled on your iPhone®, iPad® or iPod touch®, and that you’re within a foot of your Yale lock.

3. Open the Yale Secure app and agree to allow the app to access your Home Data.

4. If you do not have a home already created, create a new home when prompted. Tap + to add a new Yale Lock.

5. The app will search for your Yale Lock. Be sure that you are within close proximity (less than two feet or so). When "Yale Lock" appears, tap to add.
   *If the lock does not appear, enter your Master Pin Code on the lock keypad, tap the gear, tap 7, tap gear, tap 1 and then tap gear.

6. Scan your Accessory Setup Code; shown below, or manually enter within the app.

**Accessory Setup Code**
