Make it smart. Yale Linus® Adjustable Cylinder

WORKS WITH Linus® Smart Lock

Make your door smarter with a keyless door lock designed to secure and simplify your life.

Depending on what cylinder is currently in your door, you may need to change it in order to be compatible with the Linus® Smart Lock. The Linus® Adjustable Cylinder is guaranteed to work with the Linus® Smart Lock.

There is no need to measure your door as the adjustable cylinder is designed to expand to fit your door. Make the Linus® Adjustable Cylinder the same length as your current cylinder using the appropriate external and internal spacers.

For more information around what makes your current cylinder compatible, please see overleaf.

- EN13030 standard
- Classification code: 1 6 0 B 0 C 5 D

6 pin sawn key cylinder | **Anti pick** | **Anti drill** | **Anti bump** | **Anti pull (7 kN)**
