

Hands Up. Just as Easy. Yale Luna Elite-P

Designed for those who prioritize security with innovation, Yale Luna Elite-P brings a new level of intelligence and hygiene to home access. At its core is Yale PalmScan, one of the most secure and contactless biometric technologies available today. By scanning the unique vein pattern beneath your skin—impossible to duplicate and unaffected by surface conditions—Yale PalmScan ensures fast, hygienic, and reliable access, even with wet, dry, or dirty hands. Simply hover your palm near the sensor, and your door unlocks like magic.

Yale Luna Elite-P also features multi-factor authentication with fingerprint, CPU card, and PIN code options—giving every household member a personalized, secure way to access the home.

With built-in Wi-Fi and BLE, Yale Luna Elite-P lets you unlock, monitor, and manage access remotely—no additional hub required. It integrates effortlessly with your smart home ecosystem, offering real-time control and peace of mind, even when you're away.

The lock also features Smart Dual-Battery Technology, ensuring continuous operation by intelligently managing dual power sources to prevent unexpected power loss.

Built with safety in mind, Yale Sentry Guard keeps an eye on your doorstep, sending instant alerts and capturing video footage if someone loiters nearby. The in-body 4.7" touchscreen provides a clear, responsive interface, while the built-in doorbell and welcome light enhance both visibility and everyday convenience—blending security and style at your doorstep.
