

Yale Lumis Series

Confidence, Crafted with Elegance.

The Yale Lumis Safe redefines everyday security with a touch of refined sophistication. Wrapped in sleek design and engineered with precision, Lumis is the perfect addition to your home — whether placed in your walk-in wardrobe, study, or modern living space.

Unlocking your safe has never been easier. With advanced biometric technology, Yale Lumis allows you to access your valuables quickly through a fingerprint scan or PIN code. For peace of mind, it also comes with mechanical keys as a backup option.

Every detail is designed to elevate your experience. The motorised system opens the door automatically after unlocking, adding a seamless, touch-free moment of luxury. Inside, you'll find an elegant PU leather-lined interior and adjustable shelving, allowing you to organize your items — from passports and jewelry to documents and electronics — just the way you like.

The safe is constructed with laser-cut precision for an ultra-tight fit, enhancing protection against tampering. A smart low-battery alert ensures you're always informed, while pre-drilled holes at the back and bottom offer flexible mounting options to keep your safe securely in place.

For those who want an extra layer of protection, Lumis supports dual authentication — requiring both fingerprint and PIN for access.

Yale Lumis isn't just about storing valuables — it's about bringing confidence into your everyday life, with style and ease you can trust.

Trusted every day

Features

Fingerprint scan

PIN code
